-----

\*\*\*\*DATA SOURCE\*\*\*\*

Data were compiled from surveys conducted in the Gulf of Mexico. Data were compiled from the following TDI-Brooks lab electronic data: 10-2406, 10-2409, and 10-2426.

\*\*\*\*DATA COLLECTION PURPOSE\*\*\*\*

Natural Resource Damage Assessment

\*\*\*\*DATA USE QUALIFICATION\*\*\*\*

These data are a subset of samples collected for FL-FWC--May 2010 sampling. As more data become available, they will be added to this data set.

Values for concentration and detection limit should be interpreted to 3 significant figures.

Values for reporting limits should be interpreted to 1 significant figure.

\*\*\*\*STUDY\*\*\*\*

The data include water chemistry data.

\*\*\*\*STATION\*\*\*\*

StationIDs are based on the Grid locations.

\*\*\*\*SAMPLES AND REPLICATES\*\*\*\*

Whole water samples are included in this dataset.

The collection depth of water samples in the fields UDepth and LDepth are reported in meters.

The original SampleIDs reported by the lab from the Chain-of-Custody is stored in the ExSampID field in the SmpWat.dbf table. The original SampleID reported by field staff is stored in FldSampID in the SmpWat.dbf table.

The default labrep code "1A" was used for all data. Lab duplicates (second analysis of same sample for same analytical method) were assigned labrep "2A". Field duplicates were identified as those samples with a "D" suffix on the SampleID.

TDI Methods:

8015 B&B SOP1016 GC/FID

\*\*\*\*SUMMED PARAMETERS\*\*\*\*

No sums were calculated.

\*\*\*\*QUALIFIERS\*\*\*\*

Qualifiers recorded in the chemistry files represent the final data qualifiers provided by the data validation. Descriptions of the data qualifiers are included in the data dictionary.
